

Integrating Information Technology into Lessons - A Practical Ideas Course

"For any teacher who wishes to develop their professional skills must feel the spirit of IPC and dip into its activities. This is an experience that can not be described in words, it must be felt. Staying in Exeter and training in IPC were one of the most wonderful experiences in my life that I will never forget. Congratulations to the wonderful teachers, flawless organisation, friendliness and hospitality. Thank you for the wonderful experiences giving us."
Desislava Ivaylova Vasileva, Bulgaria, July 2016

This course has been designed for teachers who are not IT experts, but who would like to use more IT in their lessons and are not sure what is available and how it works in practice. This experiential course will address these areas as well as other areas that include cross-classroom collaboration, assessment and creating material.

COURSE DATES

Sun 15th - Sat 28th July 2018

Sun 7th - Sat 20th October 2018
